Ghost Town Bumpkin gives a brief history of the city, former Mayor, Police Chief, School Districts, and Govenor. Erly Zeballos alpha-L-Arabinofuranosidase from *Aspergillus ruberii* WB 535. The enzyme alpha-l-arabinofuranosidase was isolated from the culture fluid of *Aspergillus ruberi* WB 535, which was isolated from a mangrove sediment in Vietnam. The enzyme was purified by a combination of ammonium sulfate fractionation and gel-filtration chromatography. The specific activity of the purified enzyme was 139.9 U/mg. SDS/polyacrylamide gel electrophoresis revealed that the enzyme had a molecular weight of 84,000. The optimum pH for the enzyme was 4.5, and the optimum temperature was 70 degrees C. p-Nitrophenyl alpha-l-arabinofuranoside was hydrolyzed to p-nitrophenyl beta-l-arabinofuranoside by the enzyme. These results show that the enzyme catalyses the transglycosylation reaction.

Florida is embarking on the process of coping with an unprecedented number of these abominations. All over the state, sheriffs and county coroners are taking daily inventory of the dead. Jupiter, which is seeing its first local deaths from the virus, had a 51 percent increase in the number of deaths in the first two days after Gov. Ron DeSantis ordered “safe zones” into effect in the densely packed county. All of that is a warning: If Florida does not get its shit together in the next six to seven weeks,
