I want to use the same schema to manage Realm objects. There is a default Realm schema, that looks like this : 1 schema. I want to add some new fields in this schema. I already did the migration from database A to database B. I have used Realm migrations to do the migration from B to C. mig from B to C is working fine. When I restore the backup from B to C, the schema does not appear as schema.C in Realm What do I have to change in the realm schema to be able to change it? A: I suspect the problem you are seeing is that you have a base Realm schema that you have "upgraded" from B to C by inserting into a Realm table (e.g. _RBLMSchema) and now you are deleting that table so the data in it is not removed. If this is the case, then the easiest way to upgrade the database is to re-add the required tables and drop the ones edd6d56e20
