Q: is it possible to use ruby module to output ruby code? I'm sorry if this question is unclear. I need to develop a script to read another ruby script and output the script as a byte stream. Like described above, I use this Ruby code to read the byte stream: `require'socket' sock = TCPSocket.new('localhost', 8080)`
`sock.read_nonblock(1024)` Now I need a way to get the output ruby code as a byte stream. I find a Ruby gem of Markup.rb, which can output html markup, xml markup or whatever. I don't need that. I try to find another gem that can output ruby code. I don't find one, I only find one to output plain text. Is there any gem that can output ruby code? A: Just execute a ruby binary using `open3(3)` and pipe the stdout & stderr output to an `open3.popen3("ruby foo.rb").stdout.gets.chomp`

Q: "He's been on the company since he worked as a" Which one is correct? "He's been on the company since he worked as a X" "He's been on the company for X years." If both are correct and if they mean the same thing, why would you use "since he worked as a X" for one and "for X years" for the other? A: The first sentence: the verb is be on. The second sentence: the verb is to be (and, in that case, the subject is the person whose years they're counting). A: The first sentence is incorrect. He's been on the company since he worked as a X. In this context, the subject is "he", thus, the verb must be "has been". He's been on the company for X years. The second sentence is perfectly acceptable. A: One is correct, both are correct. The first is: He's been on the company since he worked as a X, where "he" is the subject of "been on the company", while "X" is a number that

represents the time he worked there (a number of years). The second is: He's been on the company for X years, which is an equivalent form, which can be used only for shorter periods, for example in education. The third is also OK: He's been on the company for X years, just one and the same as the second sentence. Although you can just say "He's been on the company since he worked as a X" (or since he started working there), the "for X years" part at the end is a kind of redundancy for the reader if you don't need to know the exact time.
