What's New In?

The Gradient tool allows you to control how each object is shaped and where color changes occur. Once you have outlined or filled your area, you can apply various gradients to enhance the image. The Pencil tool lets you draw with thick and thin lines or erase pixels you've already painted. Using these tools to customize your image will make it more creative and original. Creating a New Font Adding a new font to Photoshop can be challenging. This exercise will help you learn some of the basics of working with fonts, such as converting a vector file to a raster file. To open the file "key.reg" (below) as a Photoshop file, choose File > Open and find the file. It will open with a ".psd" file extension. You will need a font that you have downloaded and stored in a folder or on a hard drive. If you plan to create any type of custom web page for your printer, you will need a font that can be downloaded and shared for use in web pages. For example, this set of fonts will work just fine on a web page. The fonts are in Microsoft TrueType format and can be opened in Photoshop by using the Convert to Photoshop Fonts button on the File menu. Choose From File and select the option Convert to Photoshop Fonts. Next, click Import to find the file. The location of the file will depend on where you saved it. Find the original file, then click Open. The Photoshop window opens with the file's content. Click OK at the bottom of the window. The font file will now be added to your Photoshop library. Converting a Vector File to a Raster File You will now convert a vector file into a raster file that can be used for printing on your printer. You can use this step to print out a label or a poster. Choose File > Type and select Create Outlines. The Create Type dialog box appears. In the Shape drop-down list, choose CIRCLE. Type 50 for the Radius. If you choose a 2.5pt stroke, type 2 in the Width, and click OK. Clicking OK changes your shape to a circle. Select the Text tool and choose the font name you've chosen. You will now see the text appear on the screen. Click to convert the text into a raster image. At the
