Career Progression is a dynamic system that will enable players to improve their skills and take on bigger challenges. You will be asked to participate in more complex match types, improve your fitness levels and earn valuable player contracts and transfer requests. The new Player Impact Engine will deliver the most detailed and realistic player animations to date. Each player has an individual fatigue level - the more you play and the more matches you manage, the higher the fatigue level will be. If the Player Impact Engine is worn out the player will, following medical advice, take a training session to recover and return to action. Every game begins with a number of preset formation set-ups and you can only play with players that you have in your Ultimate Team. However, you will have the option to create up to 10 alternate formations for each game so that you can always tailor your formation to suit the game situation and to your players. Four teams have been created for the FIFA 22 betas, and we are still listening to your feedback so please keep them coming. GAME DETAILS

Pick your favorite players in Ultimate Team and boost your squad with a deep roster of over 2000 of the best footballers in the world. Build and manage your very own squad using a host of authentic off-the-pitch tactics and an all-new customisable player card editor. PURE MOBILITY EA SPORTS™ FIFA 16 Mobile is a ground-breaking new game that has been designed to deliver the pure mobility and elegance associated with a real football game, and to seamlessly connect with the player through their own actions and movements. This is EA SPORTS FIFA 16 Mobile. There are two ways to play. The traditional way with the ball and the new way, no ball, no player. The new way creates a revolutionary new way to play the game. This in turn means EA SPORTS FIFA 16 Mobile is for fans of football, who are not afraid to challenge themselves and engage with the game. Touchscreen controls are still the most effective way to play, just like in real football. You can move around the pitch with the ball to kick, pass, shoot, dribble, and control your players. The new way to play is a force of nature. The pure movement of the ball is made possible through predictive technology which creates a symphony of movement, everything from dribbling and keeping the ball moving across the pitch to accuracy and accuracy in shot placement. Or you can wait to give your players their next

move. The new touch-to-move feature works with the ball on the pitch, allowing players to tap the screen, and then follow-up touches until their next action is taken. FIND THE GRACE OF A PROFESSIONAL PLAYER There are several key differences between dribbling, shooting, and passing in your game. For instance, with dribbling, you must dribble the ball in one of the 7 zones, then make a fast decision before the opposition moves into the zone. Dribbling also requires you to maintain the ball, as it drifts out of the zone if you don't. As with real football, passing feels natural and feels like a true football movement. Like a true professional, passing requires some practice. You must build up the point on the pitch. And the points are earned through either a shot, a pass, or a tackle. Some shots feel more satisfying and natural than others. The first shot you make in a round is unlocked and has a progressively increasing difficulty. You can pass, shoot
