With any image editing application, avoid importing images from incompatible file formats or using file formats that you aren't aware of. Figure 4-1 gives you an example of how Photoshop's interface is laid out. Photoshop provides you with a multitude of adjustment tools and filters that can be applied to a layer to alter its appearance or modify it in other ways. Photoshop is one of the most powerful image editing applications available, but it has limitations. You may not be able to do everything you want to do in Photoshop or have enough graphic design experience to manipulate an image in the way that you want. To create even the most basic of images, many websites offer free image-editing tools such as PicMonkey, Photoshop Express, Gimp, or Paint.NET. You can find out more about them in Chapter 18. Photoshop for Beginners With many beginner tutorials out there, you can do Photoshop editing quite easily. Photoshop is for people with a moderate amount of image editing experience and working knowledge of computer technology. This version offers an excellent user interface, but it's slow at times and not user-friendly when you begin. More flexibility requires a little more setup time and tends to make the Photoshop user interface longer to accomplish. I recommend trying out the last version first because it works better and offers more options. **Figure 4-1:** Photoshop's interface. Setting Up Photoshop for Beginners Setting up Photoshop is fairly simple and doesn't require a ton of configurations. The most important things to do for Photoshop beginners are to create a new document and get acquainted with the main tool bars and the image window (see Figure 4-2). If you aren't familiar with the concepts of layers and the various layers in the toolbar, that's okay. The good news is that Photoshop doesn't require a ton of time or effort to learn. **Figure 4-2:** The Photoshop interface. You can perform most tasks with the shortcuts available on the keyboard as well as through menus. Still, in this section, I show you how to perform common tasks using the keyboard shortcuts and menus. Setting up Photoshop for beginners (see Figure 4-3) is pretty easy to do because you have only three things to do: **Figure 4-3:** To configure Photoshop, you create a new document. 1. Open a new document on the desktop. Windows users should choose File

Secondary glioblastoma multiforme: a re-evaluation of prognostic factors in a single institution. Glioblastoma multiforme (GBM) is the most common primary brain tumor in adults. Secondary GBM represents a very rare subgroup of GBM with poor prognosis. To assess the impact of clinical and pathological variables on outcome in adult patients with secondary GBM. We conducted a retrospective review of the medical records of patients with secondary GBM who underwent surgical resection in our center between 2010 and 2018. Multivariate analysis was performed to identify independent prognostic factors using COX proportional hazard model. Fifty patients were included in this study. Twenty-one patients (42%) presented local recurrence. Median overall survival (OS) was 12.5 months (range: 3-74 months). On multivariate analysis, WHO grade IV ($p = 0.0003$), absence of radiotherapy (RT) ($p = 0.01$) and absence of chemotherapy ($p = 0.01$) were independent prognostic factors for shorter OS. Tumor location was not an independent factor for survival ($p = 0.12$). In this series, absence of RT and WHO grade were prognostic factors for survival. These findings should be confirmed in large multicenter studies.

Q: Usage of the word "abominable" I am translating a dialogue into French. The dialogue starts like this: — Vous êtes renseignée? — Oui, effectivement, monsieur. — OK, je vous présente leur échange. Quatre jours après le fonctionnement du projet, qui se déroule à New York, le voilà rendu à la conférence pour une entrevue, avec l'idée de montrer le dernier épisode de la série, dans le quel... (rough translation: "You're informed?" "Yes, indeed, sir.") And then the author continues: — Je voudrais juste savoir que c'est fait par des professionnels.... (rough translation: "I'd just like to know that this comes from some professionals...") Now the author just used a very unusual word in the second sentence: abominable, which is

"We finally joined the ranks of other international communities and obtained certification from ISO to enjoy the benefits of the World Health Organization (WHO) standard operating procedure," said Kim Nam-chul of Jordan's Ministry of Health who chaired the verification panel, adding that "the WHO standard can be used as the basis to achieve further improvements in the quality and reliability of the Korean seafood market, and can also be used as a reference in other countries." ISO is the International Organization for Standardization (ISO), an international non-governmental standards organization with 190 member countries and territories. Korea started to export seafood to the WHO by logging onto the Organization's website in March 2012, and is the first country outside Europe to achieve this. It took two years to achieve, due to difficulties in establishing connections with the WHO's verification office, which checks seafood for food-borne pathogens, and with the Korean seafood certification agency, which is responsible for seafood regulation. The Korean side was led by Lee Hyun-wook, director general of Korea's Agricultural and Fishery Agency, and Kim Nam-chul of the Ministry of Health, while their Jordanian counterparts were represented by Mahmoud Al-Jabouri, the CEO of the Jordan Food and Drug Authority, and Ammar Al-Abbas, the Jordan Health Agency's assistant director general. The two sides signed the agreement at a press conference after the verification, but it is not yet enacted, pending the completion of the requisite procedure. The two sides are expected to discuss the way to conduct inspections

of fisheries and seafood factories and changes to the overall inspection standard in the future, the Ministry of Health said. Under the WHO's standard operating procedure for the export of fish and seafood from developing countries to developed countries, the receiving country must first verify whether the approved facilities are actually in operation, and if they aren't, inspect and assess the conditions of the facilities. The exporting country must also determine how to handle potential hazards such as microscopic organisms or chemical contaminants that may be present in the seafood and ensure the safety of the products during transit to the destination. If the receiving country approves the food, it is obliged to pass it on to consumers. Korea has exported seafood for the first time since 2007, when it sent two tons of seafood to Japan, to demand that Japan recognize the trade, after Japan insisted that it import only domestic seafood products. After Japan approved the imports, Japan's Deputy Trade Minister Hiroshi Hashimoto said that he
